[LinkedIn](#) | [GitHub](#) | [LeetCode](#)

OBJECTIVE

Second-year B.Tech Computer Science student with hands-on experience building and deploying full-stack web applications. Seeking an SDE internship to apply strong problem-solving skills, front-end development experience, and a growing foundation in backend and AI-assisted development.

EDUCATION

University Visvesvaraya College of Engineering (UVCE), Bengaluru

Bachelor of Technology, Computer Science and Engineering — Expected 2029 | CGPA: 9.64

Seshadripuram Independent PU College — PCMC, 98.5%

PROJECTS

SyncCanvas | React, Node.js, WebSockets | [Live Link](#)

- Built a real-time collaborative code editor enabling multiple users to write and edit code simultaneously, using WebSockets for live synchronization.
- Developed the frontend with React and the backend with Node.js/Express, designing a low-latency WebSocket-based architecture for seamless multi-user collaboration.

Crypto Price Tracker | React, Recharts, React Router, CoinGecko API, Vercel | [Live Link](#)

- Built a real-time cryptocurrency tracker displaying live prices, market caps, 24h change, and 7-day price charts using the CoinGecko API.
- Implemented dynamic routing for individual coin detail pages and a Vite proxy to resolve CORS/rate-limit issues with the public API.
- Solved mobile responsiveness issues in chart rendering using a window-resize hook and adaptive label sampling for smaller screens.

Taskify | HTML, CSS, JavaScript, PWA

- Developed a drag-and-drop task management web app with automatic task counting and column-based organization.
- Configured manifest.json to make the app installable as a Progressive Web App with custom icons and theme colors.

TECHNICAL SKILLS

Languages: C, C++, JavaScript

Frontend: HTML5, CSS3, React, TailwindCSS

Backend & Database: Node.js, Express.js, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Figma, Vercel, Netlify

Core Concepts: Data Structures & Algorithms, OOP, Full-Stack Development

ACHIEVEMENTS & ACTIVITIES

- Built AgroAI, an AI-powered web app for plant disease detection, live weather, and crop price tracking, at the CodePup hackathon (React, Node.js, FastAPI, TensorFlow).
- Participated in the Vibe Coding event organized by UVCE E-Cell and Codepup, gaining exposure to hackathon-style rapid development.
- Participated in the CodeFurry hackathon.
- Solved 150+ problems on LeetCode across arrays, strings, and core data structure topics.
- Maintained 700+ GitHub contributions over the past year through consistent daily coding practice.
